

Project: Installation works at branch "North"

Customer: JSC "Electrical Networks of Armenia"

Year: 2012

Performed works:

- Installation and commissioning of 0.4 kV cable line for the residential complex
- Installation of distribution panels
- Installation of electricity counters

Project: Manufacturing of steel structures

Customer: CJSC "South Caucasian Railroad"

Year: 2012

Performed works:

- Manufacturing of steel structures for the train stations

Project: "Golden Palace" hotel

Customer: "Artashat ECS" LLC

Year: 2012

Performed works:

- Installation of distribution panels
- Manufacturing of necessary steel structures
- Installation of 10 kV power cable
- Construction of earthing system

Project: Airport “Shirak”. 6 kV substations N1 and N4

Customer: CJSC “Armenian International airports”

Year: 2012

Performed works:

- Repair and re-commissioning of relay protection system
- Repair and re-commissioning of automatic protection system
- Repair and re-commissioning of oil filled circuit breakers system
- Repair and re-commissioning of alarm system

Project: Construction of second power supply scheme for airport “Shirak”

Customer: CJSC “Armaeronavigation”

Year: 2012

Performed works:

- Civil construction works
- Installation of steel pipes
- Installation of power cables and muffs
- Installation of compact transformer substation
- Manufacturing and installation of distributional panels

Project: Installation works at Technical Services building

Customer: JSC “Armenian Airlines”

Year: 2012

Performed works:

- Construction of earthing system

Project: Installation works at branch "West"

Customer: JSC "Electrical Networks of Armenia"

Year: 2012

Performed works:

- Rehabilitation of 0.4 kV overhead lines at Vardashen area

Project: Inspection and repair of power transformers

Customer: "GeoProMiningGold" LLC

Year: 2012

Performed works:

- Inspection and repair of 6kV, 63 kVA power transformers
- Inspection and repair of 6kV, 160 kVA power transformers
- Inspection and repair of 6kV, 250 kVA power transformers
- Inspection and repair of 6kV, 400 kVA power transformers
- Inspection and repair of 6kV, 630 kVA power transformers
- Inspection and repair of 6kV, 1000 kVA power transformers
- Inspection and repair of 6kV, 1600 kVA power transformers

Project: Reallocation of overhead line

Customer: JSC "Electrical Networks of Armenia"

Year: 2012

Performed works:

- Reallocation of 10kV overhead line "Lchap"

Project: Construction of new 10/0.4 kV SS and 10 kV OHL “Gyumri City”

Customer: JSC “Electrical Networks of Armenia”

Years: 2012-2013

Performed works:

- Installation of steel-concrete supports
- Manufacturing of earthing system and installation of the wire
- Installation of power transformer
- Installation of power panels
- Installation of power cables
- Manufacturing and installation of strip foundations
- Soil works
- Construction of the substation building
